

IEEE IITC 2025

June 2-5, 2025 | Westin Josun Busan, **Busan**, Korea

Prof. Il-Kwon Oh

Ajou University, Korea

Prof. Oh is an associate professor at Ajou University. His current research interests and topics are focused on fabricating emerging electronic devices with nanostructured materials and especially, cover wide range of semiconductor fields; 1) the fabrication and evaluation of electronic devices including in semiconductor/memory devices, and 2) the fabrication and elucidating of new concepts of electronic devices with novel nanostructures by controlling surface chemical reaction. He recently published the study on topological semimetals at Science journal.
